EDUCATION

California Polytechnic State University

San Luis Obispo, CA

Bachelor of Science in Computer Engineering

Anticipated graduation: June 2029

- **Academic standing (by credit):** Junior
- **Current coursework:** Object-Oriented Design (Java), Digital Design (Verilog, RISC-V Assembly), Differential Equations, Physics (Circuits and Electronics)

Continued Learning: AWS Academy - Cloud Developing, AWS - Prompt Engineering/Bedrock/Lambda Functions, web development with HTML/CSS/Flexbox, applications of intelligence

High School GPA: 4.61 | SAT: 1580

College-Level Coursework: C/C++ w/ Data Structures & Memory Allocation, Computing w/ Python, Physics, Analytic Geometry & Calculus, Linear Algebra/Vector Analysis, Statistics & Probability

TECHNICAL + LEADERSHIP EXPERIENCE

Software Engineering Intern | AWS/Cal Poly DxHub, San Luis Obispo, CA | Oct 2025 - present

- Prototyped serverless AI-powered navigation system with Retrieval Augmented Generation to reclaim >40 hrs/semester for college students during hackathon
- Reduced client cost for intelligent document summarization by employing Python libraries and techniques before falling back to Textract
- Designed and implemented invoice processing and reconciliation system with frontend on React and backend on AWS Lambda + API Gateway + S3. Utilized multi-stage LLM prompting for cost-efficiency and hallucination reduction
- Communicate with team members, using Git for version control and Slack for project management

Technical Lead | CodeBox, San Luis Obispo, CA | Sep 2025 - present

- Organized team of product manager + 9 engineers using GitHub issues and projects
- Architected solution for Note Sharer, a web app where students upload course resources, earning credits to access others' materials, solving the free-rider problem, and reducing reliance on paywalled alternatives. Tech stack: React + Next.js and Supabase for DB/storage
- Programmed login flow, resource uploading + storage + querying

Certified Instructor | Mathnasium - The Math Learning Center, Alameda, CA | Jan 2024 - May 2025

- Used Socratic reasoning and the Mathnasium method to train K-12 students, 4 at a time, to enhance number sense and problem-solving ability
- Became point person for difficult questions. Managers turned to me for their inquiries

President, Coach, Team Captain | CHD Academy Junior Classical League | Aug 2021 - present

- Developed yearly syllabus, weekly quizzes, Kahoot sets. Led Zoom practices for 20-30 students
- All teams finished in top 3 for their respective categories at state competition
- 2024 CAJCL Overall Academic + Combined 1st Place Statewide

TECHNICAL SKILLS

Programming: C/C++, Python, Java, TypeScript, HTML, CSS, SystemVerilog

Artificial Intelligence: RAG, Full-stack GenAI App Development, Prompt Engineering

Frameworks/Technologies: React, Next.js, PostgreSQL

Developer Tools: Git, Docker

Operating Systems: MacOS, Linux, Windows
